EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Barbieri (Registration # 46215) on April 30, 2009.

The application has been amended as follows:

Claim 24 has been amended as follows:

On line 18 of the claim, "the proper RF channel" should be --a proper RF channel--.

Claim 30 has been amended as follows:

On line 3 of the claim, "the selected viewable program channel" should be --the selected viewable program--.

Claim 34 has been amended as follows:

On line 18 of the claim, "the proper RF channel" should be --a proper RF channel--.

Claim 40 has been amended as follows:

On line 3 of the claim, "the selected viewable program channel" should be --the selected viewable program--.

Allowable Subject Matter

2. Claims 24-43 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The art of record either alone or in combination fails to teach, disclose, or suggest the invention of claims 24 and 34 and in particular generating an entry of channel assignment information in a programming database for each identified viewable program in combination with other elements recited in the claims.

The closest art of record, Kondo, discloses modulating a plurality of viewable programs (a_1 to a_4 for example) stored in digital video signal provider (10A-10T - figure 1) to one of a plurality of RF channels (i.e., as shown in figure 2, viewable programs a_1 to a_4 are modulated to RF channel C_1), such that the at least one RF channel (C_1) is configured to transmit multiple viewable programs (a_1 to a_4 - figure 2) on a single RF channel (C_1) based on the hardware configuration of the passenger entertainment system (figure 1), wherein the RF channels (C_1 to C_{20}) are mapped to the viewable programs (a_1 to a_{80}) independent of an equally-distributive relationship between the RF channels and the viewable programs (Col. 4, lines 5-44).

However, Kondo does not disclose, suggest, or teach generating an entry of channel assignment information in a programming database for each identified viewable program in combination with other elements recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
